# AFVi...The Answer Place for Fleets™

Today's fuel and vehicle choices are confusing. There is a huge amount of information about a growing number of options, and the information is often conflicting. But, you need to get it right.

Looking at your unique situation, AFVi helps you understand what's *really* viable. For over 25 years, AFVi has been helping fleets make informed, practical and economically sound fuel and vehicle decisions. AFVi's management team is a group of seasoned experts in the alternative fuel industry who understand the needs of fleets and know how to help you avoid the pitfalls that stand in the way of making the right fuel and vehicle technology decisions.

You can trust AFVi's advice, training and other services to be objective, accurate and cutting edge, yet practical and completely unbiased. AFVi is fuel and technology neutral - we have no vested interest in a given fuel or vehicle technology. Our only goal is to help you get it right.

## Meet the AFVi Directors

**Annalloyd Thomason** is AFVi's Executive Director. She has been directly involved in the alternative fuel industry since 1989, working with a who's who list of companies to help them analyze markets and create real-world implementation plans for AFVs. An accomplished conference leader, trainer and education planner, Annalloyd also advises fleets and others on how to make the right alternative fuel and vehicle choices for their operation. Her experience with and knowledge of all fuel and vehicle options makes Annalloyd an invaluable asset in making the right fleet choices.

**Leo Thomason** is Director of Training and Technical Consulting for AFVi and, with 20 years of direct industry experience, is a venerable pioneer in the alternative fuels and vehicles industry. Leo has developed and presented hundreds of timely and practical courses and training programs on a variety of cutting edge alternative fuels topics attended by over 10,000 fleet representatives and industry stakeholders in the past decade. In addition, Leo consults world-wide on alternative fuel applications. Known for his practical solutions and ability to demystify complex technologies, Leo is in high demand with fleet managers.

**Kimberly Taylor** is Director of Business and Education Programs and has a long professional background in alternative fuels and vehicles. Prior to joining AFVi, Kimberly worked for the U.S. Department of Energy's (DOE) National Renewable Energy Laboratory as a Senior Project Leader in the Center for Transportation Technologies and Systems. At AFVi, Kimberly has primary responsibility for all annual conference programming, as well as programming for other AFVi educational events. Kimberly writes and edits AFVi's Daily News where she is known for no nonsense, "cut to the chase" analyses.

**Jackie Lanning** is Director of Market Development and Information and is responsible for market definition and development, through market research, marketing and database management. In addition, she assists with program development and is responsible for production and delivery of information to targeted markets. Jackie brings nearly 20 years of market research and development to AFVi, having worked for 12 years in the banking and utility industries prior to joining the team six years ago. She has served on the local Board of Directors for the American Marketing Association.
